ABHISHEK PANTHALINGAL

Bellevue, WA | abhisheknr4@gmail.com | 765-631-9411 | linkedin.com/in/6foot4

PROFESSIONAL PROFILE

AI, analytics, and product engineering leader with approximately nine years of progressive experience in software engineering, enterprise analytics, cloud-native platforms, solution architecture, and technical team leadership. Appointed Director, AI & Analytics Practice at Rhombuz LLC in October 2026, following service as Lead Product Technologist. Experience delivering data-driven platforms and AI-enabled applications for enterprise clients including T-Mobile US, TOMRA, Albertsons, and Comcast. Technical expertise spans Microsoft Azure, Databricks, Snowflake, React, Next.js, TypeScript, and modern API and cloud architectures.

PROFESSIONAL EXPERIENCE

Director, AI & Analytics Practice | Rhombuz LLC | Bellevue, WA | Oct 2026 – Present

- Reports directly to the CEO and leads the AI & Analytics practice, including AI-led programs for Piktorlabs and development of Rhombuz's Data Experience Workbench (DEW) platform.
- Practice Leadership: Directly reports to the CEO and is responsible for the direction and coordination of Rhombuz LLC's AI & Analytics practice.
- AI Program Leadership: Leads all AI-led programs of Piktorlabs, overseeing program priorities and coordination of AI and analytics initiatives.
- Platform Development: Responsible for development of Rhombuz's Data Experience Workbench (DEW), a strategic platform intended to be a core part of the company's future product offering.
- Talent Acquisition & Team Development: Leads recruitment and technical evaluation for AI, analytics, and engineering roles; oversees onboarding, training, mentoring, and professional development of team members to build the practice's technical capabilities and delivery capacity.

Lead Product Technologist | Rhombuz LLC | Seattle/Bellevue, WA | Apr 2025 – Sep 2026

Provided technical leadership, solution architecture ownership, direct client engagement, and input into technical hiring across T-Mobile US and TOMRA programs.

- T-Mobile — Executive Network Analytics: Architected an executive analytics platform supporting network build, performance, and planning decisions; designed a five-level geographic data hierarchy spanning more than 80 markets.
- Developed reporting views using Snowflake and Azure PostgreSQL over datasets ingesting millions of rows daily; implemented Azure Application Insights and KQL usage analytics, including adoption and retention metrics.
- T-Mobile — AI & Anomaly Detection: Built Databricks-based anomaly detection for 5G network performance; integrated a Databricks-hosted Llama 70B model to produce understandable root-cause analysis and recommended actions.
- T-Mobile — Cloud Engineering: Led Azure service migration and private-network cutover; resolved authentication issues across Azure Container Apps, Cosmos DB, and Entra ID; managed CI/CD and deployment credentials.
- T-Mobile — Supply Chain: Owned UI and API architecture for a control tower application providing visibility into device distribution, inventory, and servicing.
- TOMRA — Industrial Application: Designed and delivered an iPadOS application integrating industrial weighing and display devices over Bluetooth Low Energy; supported rollout to at least five California collection locations.
- Internal Engineering: Developed technical interview frameworks for engineering hires; explored on-premises AI inference architectures for data-residency needs and built a briefing workflow with prompt-injection safeguards.

Lead II, Software Engineering | UST | Seattle, WA | Jan 2023 – Mar 2025

- Albertsons: Led frontend development for an enterprise retail product; designed React/Next.js architecture that improved page-load speed by 30% and reduced maintenance overhead by 25%.
- Improved test coverage by more than 20% using AI-assisted tools; guided UX implementation, security hardening, cross-functional collaboration, and client communications.
- Comcast: Led MVP development across interdisciplinary teams; implemented Docker, Kubernetes, and CI/CD pipelines, reducing deployment times by 40%; conducted code reviews and mentoring.
- T-Mobile: Developed executive decision-support dashboards and optimized a data visualization library, improving Lighthouse performance scores from 75 to at least 95.

Senior Design Technologist / Product Engineer | Piktorlabs | Seattle, WA / Bengaluru, India | Jun 2019 – Dec 2022

- Led engineering engagements including T-Mobile contract work and end-to-end delivery of GoTag, from design through ADP Marketplace release and compliance testing.
- Built cross-platform React Native applications for iOS and Android, reducing development redundancy by 40%; improved application performance through state-management and network optimizations.
- Used Docker and Kubernetes to support scalable application deployment.

Software Engineer | Moonraft Innovation Labs | Bengaluru, India | Sep 2017 – May 2019

- Developed features for NorthStar, an enterprise application serving more than 17,000 users.
- Delivered the organization's first React.js project, helped drive internal adoption, and mentored junior developers through workshops.

TECHNICAL EXPERTISE

- **Cloud & Data:** Microsoft Azure (App Service, Container Apps, Functions, Cosmos DB, PostgreSQL, Application Insights, Entra ID, Private Endpoints), Databricks, Snowflake, AWS, SQL, KQL
- **AI & Analytics:** LLM application integration, anomaly detection, prompt engineering, prompt-injection guardrails, MCP-based tooling
- **Engineering:** React, Next.js, React Native, Redux, TypeScript, JavaScript, Node.js, Express, GraphQL, REST APIs, MongoDB
- **Platforms & Practices:** Docker, Kubernetes, GitLab CI/CD, Agile/Scrum, TDD, architecture, code review, mentoring, BLE and industrial hardware integration

EDUCATION

- **Bachelor of Engineering, Mechanical Engineering** | 2017, Graduated with Distinction | University Visvesvaraya College of Engineering (UVCE), Bangalore University, Bengaluru, India
- UI/UX Design Bootcamp | DesignBoat UI/UX School, Bengaluru, India | 2021
